Solugran[®]

The solubility solution

Solugran®

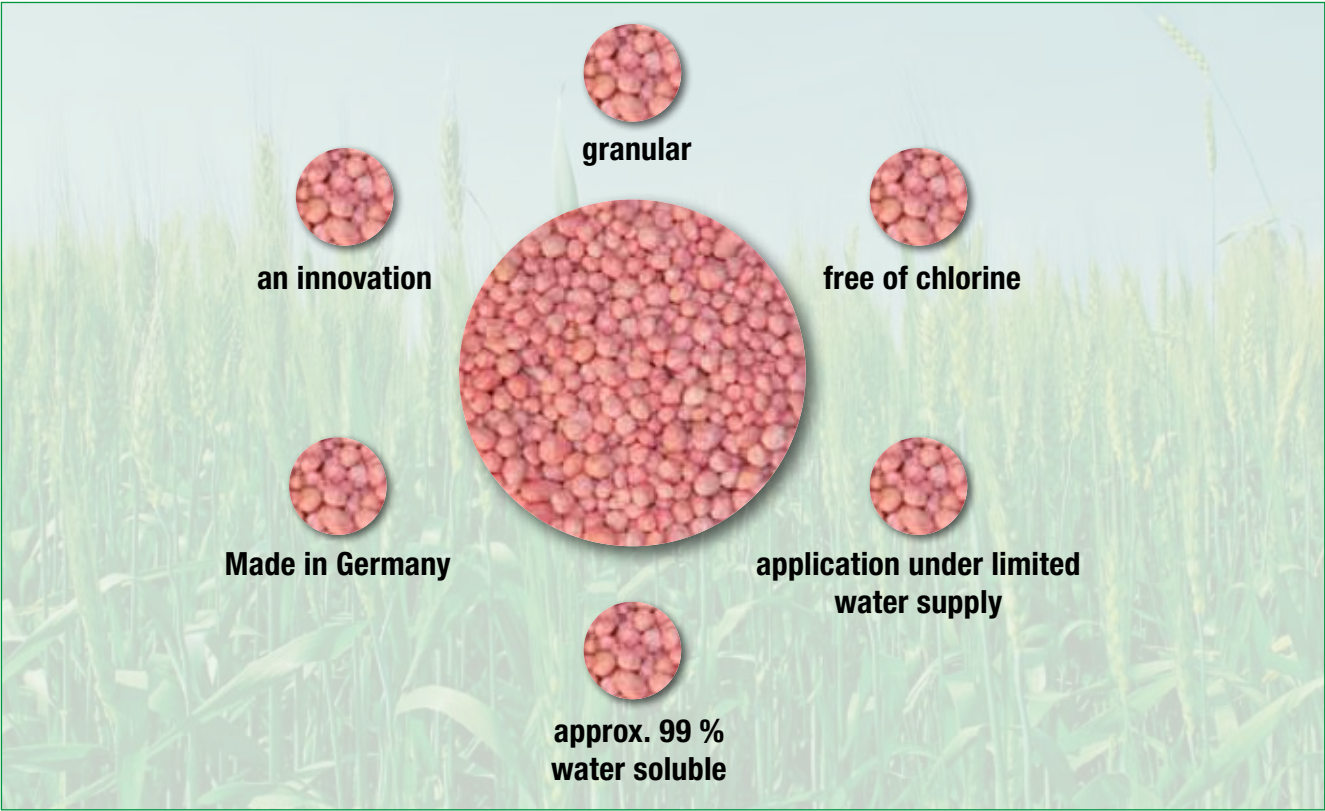

Granulated Fertilizer with extremely fast solubility for vegetables, fruit and cereals under arid conditions

- Product innovation combining advantages of both mineral NPK and water-soluble NPK
- Nearly 100 % water-soluble like fertigation products
- Easy application by hand or spreader like conventional granulated fertilizers
- Fast delivery to the plant roots, even with limited water supply from rain or irrigation
- Product is dissolved by episodic rainfall or even morning dew
- Reduction in gaseous loss
- Ideal as top dressing

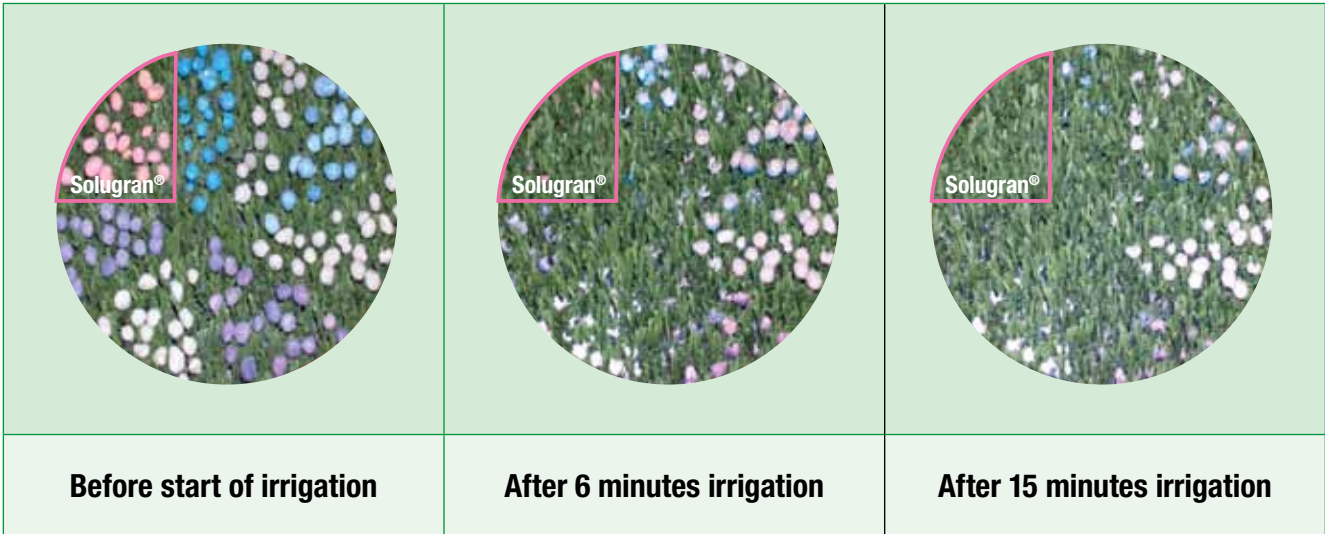

Solugran®

Fertilization in various crops

Superior solubility

Product	Composition	Characteristics	Presentation	Use
Solugran®	17-9-20	Highly soluble NPK fertilizer - Balanced nutrient ratio - Low chlorine - Easy to apply by hand or spreader - Fast effect, even with limited water supply	Bag: 25 kg Pallet size: 42 x 25 kg	Fruit crops Vegetable crops Cereals 1 – 2 applications per season Application rate depends on crop species and yield
Solugran®	23-5-5*	Highly soluble NPK fertilizer - High N content - Low chlorine - Easy to apply by hand or spreader - Fast effect, even with limited water supply	Bag: 25 kg Pallet size: 42 x 25 kg	Fruit crops Vegetable crops Cereals 1 – 2 applications per season Application rate depends on crop species and yield

* will be available soon
