

Floranid Master extra 19+5+10(+2)

Version 1
Revision Date 03/22/2005

Print Date 03/22/2005

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING

Product information

Trade name : Floranid Master extra 19+5+10(+2)

Use of the Substance/Preparation : fertiliser

Company : COMPO GmbH & Co. KG
Gildenstraße 38
D-48157 Münster

Telephone : +49-0251/3277-0
Telefax : +49-0251/326225

Emergency telephone number : BASF works fire brigade Ludwigshafen
Telephone: 0621-60-43333

2. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical nature

NPK - fertilizer contains: Ammonium Nitrate, N,N'-(2-Methylpropyliden)-bis-urea, Ammonium Phosphate, other phosphates, salts of: calcium, potassium, possibly magnesium sulphate, trace element combination.

Hazardous components

Chemical Name	CAS-No.	EINECS-No.	Index-No.	Symbol(s)	R-phrase(s)	Concentration [%]
Ammonium Nitrate	6484-52-2	229-347-8				>= 10,00 - <= 70,00

For the full text of the R phrases mentioned in this Section, see Section 16.

3. HAZARDS IDENTIFICATION

Risk advice to man and the environment

No particular dangers occur if the regulation/notes for storage and handling are observed.

4. FIRST AID MEASURES

Inhalation : If difficulties occur after dust has been inhaled, remove to fresh air and seek medical attention.
On inhalation of decomposition products:
Inhale corticosteroid dose aerosol (e.g. dexamethazone).
Keep patient calm, remove to fresh air, seek medical attention.

Skin contact : Wash thoroughly with soap and water.

Floranid Master extra 19+5+10(+2)

Version 1
Revision Date 03/22/2005

Print Date 03/22/2005

- Eye contact : Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.
- Ingestion : Rinse mouth immediately and then drink plenty of water, seek medical attention.

Notes to physician

- Risks : Inhalation of decomposition products can lead to lung oedema. Symptoms can appear later. Danger of methaemoglobin formation.
- Treatment : Treat according to symptoms (decontamination, vital functions), treat with toluonium chloride to reverse methaemoglobinanaemia. Pulmonary odema prophylaxis.

5. FIRE-FIGHTING MEASURES

- Suitable extinguishing media : water
- Extinguishing media which must not be used for safety reasons : foam
dry chemical
carbon dioxide (CO₂)
sand
- Specific hazards during fire fighting : Can decompose at above 100 °C. Thermal decomposition products:
Nitrogen monoxide, nitrogen dioxide, dinitrogenoxide, ammonia
Isobutyraldehyd
- Special protective equipment for fire-fighters : Wear a self-contained breathing apparatus.
- Further information : Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

6. ACCIDENTAL RELEASE MEASURES

- Environmental precautions : Do not flush into surface water or sanitary sewer system. Retain and dispose of contaminated wash water.
- Methods for cleaning up : Use mechanical handling equipment.

7. HANDLING AND STORAGE

Handling

- Advice on protection against fire and explosion : The product is incombustible. It can lower the ignition temperature of combustible substances.

Floranid Master extra 19+5+10(+2)

Version 1
Revision Date 03/22/2005

Print Date 03/22/2005

Keep away from sources of ignition - No smoking.
Keep away from combustible material.
Avoid influence of heat.
Risk of explosion if heated under confinement.

Storage

Requirements for storage areas and containers : When stored loose do not mix with other fertilizers.
Store well away from other substances.
Keep away from direct sunlight.
Protect against heat.
Avoid contamination.
Protect against humidity (product is hygroscopic and tends to cake or disintegrate)

German storage class : 5.1C

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Personal protective equipment

Respiratory protection : Breathing apparatus only if aerosol or dust is formed.
Hygiene measures : At the end of the shift the skin should be cleaned and skin-care agents applied.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance

Form : granular
Colour : various, depending on the colorant
Odour : almost odourless

Safety data

pH : approx.6,2
at 100 g/l (20 °C)
Bulk density : approx.920 kg/m³
Water solubility : mainly soluble

10. STABILITY AND REACTIVITY

Materials to avoid : oxidizable substances

Floranid Master extra 19+5+10(+2)

Version 1
Revision Date 03/22/2005

Print Date 03/22/2005

	substances with an acid reaction alkaline reactive substances
Hazardous decomposition products	: Nitrogen monoxide, nitrogen dioxide, dinitrogenoxide, ammonia Isobutyraldehyd
Thermal decomposition	: approx. 100 °C To avoid thermal decomposition, do not overheat. Thermal decomposition above the indicated temperature is possible. The product is not capable of self-sustaining progressive thermal decomposition (UN S1).
Hazardous reactions	: Evolution of ammonia under influence of alkalis.

11. TOXICOLOGICAL INFORMATION

Acute oral toxicity	: LD50 rat Dose: > 2.000 mg/kg
Skin irritation	: rabbit Result: non-irritant Method: OECD Test Guideline 404
Eye irritation	: rabbit Result: non-irritant Method: OECD Test Guideline 405
Further information	: Danger of methaemoglobin formation. The product was not tested. The statement was derived from products of similar structure and composition.

12. ECOLOGICAL INFORMATION

Elimination information (persistence and degradability)

Physico-chemical removability	: DOC reduction approx. 85 % Remarks: May be eliminated in purification plants
-------------------------------	---

Ecotoxicity effects

Toxicity to fish	: LC50 Species: Rainbow trout Dose: > 100 mg/l Exposure time: 96 h Method: Directive 92/69/EEC, C.1, Acute toxicity for fish
aquatic invertebrates	: EC50 Species: Daphnia magna

Floranid Master extra 19+5+10(+2)

Version 1
Revision Date 03/22/2005

Print Date 03/22/2005

	Dose: > 100 mg/l Exposure time: 48 h Method: Directive 84/449/EEC, C.2
Toxicity to algae	: EC50 Species: green algae Dose: > 100 mg/l Exposure time: 72 h
Toxicity to bacteria	: activated sludge EC0 Species: Pseudomonas putida Dose: approx. 640 mg/l Exposure time: 16 h Method:
Additional ecological information	: Inhibition of degradation activity in activated sludge is not to be anticipated during correct introduction of low concentrations. There is a high probability that the product is acute not harmful to aquatic organisms. information on: Isodur

13. DISPOSAL CONSIDERATIONS

Product	: Test for use in agriculture. Contact manufacturer.
Contaminated packaging	: Contaminated packaging should be emptied as far as possible; then it can be passed on for recycling after being thoroughly cleaned.
Waste key for the unused product	: 02 01 09: Wastes of chemicals for the agriculture excepted of those, which are listed under 02 01 08

14. TRANSPORT INFORMATION

Further Information

Not classified as dangerous in the meaning of transport regulations.

15. REGULATORY INFORMATION

Labelling according to EC Directives

The product does not require a hazard warning label in accordance with EC Directives.

National legislation

Further information : German "Hazardous Substances" legislation (

Floramid Master extra 19+5+10(+2)

Version 1
Revision Date 03/22/2005

Print Date 03/22/2005

Gefahrstoffverordnung) appendix V, No. 2 (Ammonium Nitrate group C)

Water contaminating class : WGK 1 slightly water endangering (Germany)

16. OTHER INFORMATION

Further information

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text.
