

# Specialty Fine Grade Mineral Fertilizer for Turf

## Easygreen mini

- NPK compound fertilizers with immediate effect
- Small granule size for better and homogenous spreading

## Easygreen mini – Fine granule size for high value turf

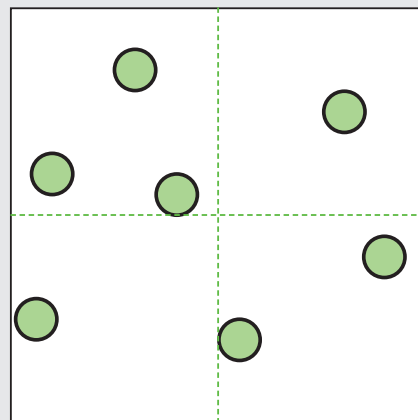

Two NPK fine grade formulas designed for fairways, soccer pitches and other valuable turf fertilization requiring immediate nutrient supply.

- 1 g Easygreen mini = approx. 100 granules
- 8 times smaller granules than conventional NPK fertilizers
- NPK fine grade fertilizer (1.0–2.5 mm)
- All nutrients in one granule
- Including vital micronutrients

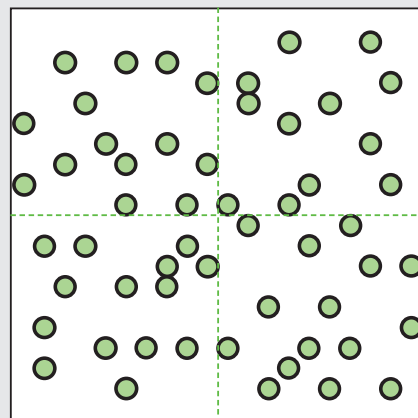

Granule distribution – Easygreen mini

Conventional grade;  $20\text{g/m}^2 = 125$  granules

Easygreen mini grade;  $20\text{g/m}^2 = 2,000$  granules

## High profile fine grade turf fertilizer

### Advantages

High quality fine grades

- Better sward penetration and therefore less scorching
- Optimal spreading
- Less visibility of applied product
- Quick dissolving after first irrigation

All nutrients in each granule

- Each granule contains macro and trace elements
- No segregation of nutrients inside the bag

Safe and efficient product application

- Suitable for reduced application rates in fairways
- No fertilizer collection by mowing equipment

High quality of raw materials

- All nutrients are fully available to plants
- No urea and virtually free of chloride

### Recommended application

**Fairways/Lawns**

- 2–3 applications per year

**Football and Sport Fields**

- 2–5 applications per year

### Easygreen mini grade

## General recommendations\*

Product	Dosage (g/m <sup>2</sup> or kg/1,000 m <sup>2</sup> )	Time of application
Easygreen mini 21	20–35	spring, summer
Easygreen mini 12	20–35	autumn, hot summer

## Easygreen mini product range

	Product	Composition	Characteristics	Packaging	Application rates*
	Easygreen mini 12	12-12-17 (+ 2 MgO + 20 SO <sub>3</sub> ) + 0.02 % B + 0.06 % Fe + 0.01 % Zn	<ul style="list-style-type: none"> <li>– NPK compound fertilizer for fairways and low cut turf</li> <li>– Fine grading (1.0–2.5 mm) for ideal sward penetration</li> <li>– High Potassium against stress (cold, wet, dry conditions)</li> </ul>	Bag: 25 kg  Pallet size: 42 x 25 kg  Container 21': 20 x 1,050 kg	20–35 g/m <sup>2</sup>
	Easygreen mini 21	21-5-10 (+ 3 MgO + 15 SO <sub>3</sub> ) + 0.02 % B + 0.3 % Fe + 0.02 % Zn	<ul style="list-style-type: none"> <li>– NPK compound fertilizer for fairways and low cut turf</li> <li>– Fine grading (1.0–2.5 mm) for ideal sward penetration</li> <li>– High Nitrogen for spring use</li> </ul>	Bag: 25 kg  Pallet size: 42 x 25 kg  Container 21': 20 x 1,050 kg	2–5 applications per year
